-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3662

1. Claims 10-14 are objected to because of the following informalities:

As to claim 10, line 14, 17, 20, 21, 24; claim 11, line 5, 9; claim 12, line 15, 17; claim 13, line 20, 22; claim 14, line 1, "unitunit" is misspelled. Appropriate correction is required.

2. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 15, lines 10-12, "the address information items...to the base station and/or mobile station" is indefinite because this is read as a single means claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Hofgen et al (Pat. No. 5,363,109).

Hofgen et al teach a position calculating apparatus for calculating the position of a mobile station by using reception timings (col 7, lines 28+) and reception positions of signals (fig. 6) including the address information items (col 4, lines 1-14; col 10, lines

Art Unit: 3662

12-42) necessary to specify incoming signals used for the position calculation are communicated to the base station S1 to S4 and/or mobile station 100.

5. Claim 15 is rejected under 35 U.S.C. 102(e) as being anticipated by Motegi et al (US 2004/0254980) or Sakamoto et al (Pat. No. 6,807,427).

Motegi et al teach a position calculating apparatus for calculating the position of a mobile station by using reception timings (paragraph 0007+; fig. 17B, 17C) and reception positions of signals (fig. 4A) including the address information items (paragraph 0029) necessary to specify incoming signals used for the position calculation are communicated to the base station 2 and/or mobile station 1.

Sakamoto et al teach a position calculating apparatus for calculating the position of a mobile station by using reception timings 104, 205 and reception positions of signals including the address information items (204; col 9, lines 54-57) necessary to specify incoming signals used for the position calculation are communicated to the base station and/or mobile station.

6. Claims 1-9 are allowed.

7. Claims 10-14 would be allowable if rewritten or amended to overcome the objection(s).

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (703)306-4167. The examiner can normally be reached on M-F 9:00-5:30.
